

MixCare®

MixCare®

THE PERFORMANCE PARTNERSHIP

MixCare™ delivers the most efficient solution for ongoing, consistent and productive mixing for your business.

Our mixers are designed and produced to the highest standards using the best available materials and components. All our products undergo rigorous testing and inspection before first use.

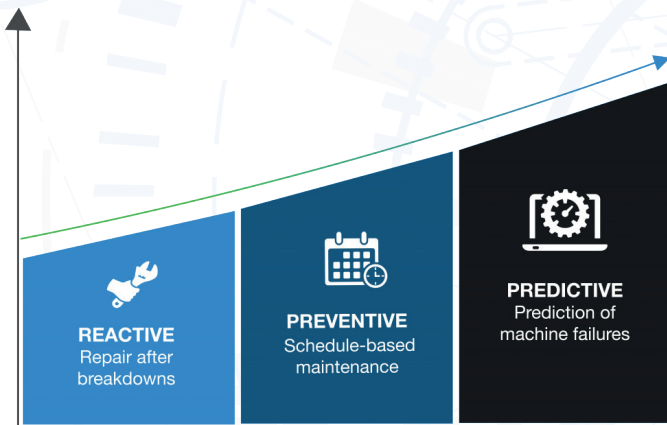

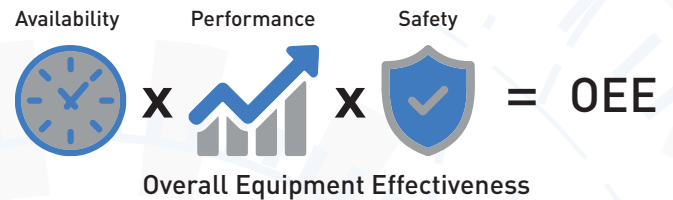

However, all process equipment needs regular maintenance to ensure sustained high performance.

Operating equipment without regular checks can result in reduced performance, consequently increasing the risk of financial, or even physical loss.

MixCare™ supports Asset Management of your critical mixing equipment and facilitates increased Mean Time Between Repair (MTBR).

CERTIFIES SAFE AND EFFICIENT OPERATION

- Reassurance that equipment is operating safely and efficiently
- Confidence that equipment complies with HSE/PUWER regulations
- Inspection report issued with a summary of recommendations for ongoing safety compliance

Maintenance Strategy

MINIMISES THE RISK AND COST OF FAILURE

- Each mixing installation receives an annual inspection by a Greaves engineer
- Inspections arranged to fit around your production schedules
- Opportunities for process improvements are identified and reported
- Quality assured OEM replacement parts are fitted as required, at additional cost
- Critical spare part recommendations made for clients on-site stock
